

Project

Fappiano

Total Integrated Irrigation Management System

Project Name	Fappiano
Country	San Joaquin Valley, California, USA
General Description	<ol style="list-style-type: none">1. Project size: 190 acres2. Type of project: Orchard, Almonds3. Irrigation Method: Drip4. Water quality Poor5. Inlet / Pumping Pressure: 40 psi6. Flow data (Total and per irrigation set): 1800gpm
Installation Date	New installation, 2016
BERMAD Solution	<ol style="list-style-type: none">1. total Integrated Irrigation Management Solution: valves, air valves, water-meters, filters2. Automation: media filter, automation, mag meter, zone control valves, pressure relief valves and air relief valves3. Project USD value: \$53,592
Project Story	<p>Grower looked for the most efficient backflush filter, that will also be easy to install and maintain. The grower also wanted a system that all its components are integrated and designed to work together without coordinating between different vendors. BERMAD is the only supplier capable of providing the technical expertise for pre and post-sale support, together with its superior products, such as Filters, Electromagnetic Flow Meters, Automation, Control Valves, and Air Relief Valves.</p>
